GENERAL MEMBER DUES

Applicant is eligible for CPA membership if the company meets one of the following criteria (check one only):

☐ **General Member:** Applicant must be a North American producer of particleboard, medium density fiberboard, hardboard, engineered wood siding and trim or other compatible products as defined by the CPA Bylaws. Each General Member company is entitled to designate one primary and one alternate representative to the CPA Board of Directors.

☐ **Non-Producing General Member:** Applicant meets the criteria as described above, but does not yet operate facilities in North America though firmly committed either to build or buy such facilities and is in the process of becoming a North American manufacturer. Applicant can demonstrate that a major financial commitment for such construction or purchase has been secured and a construction or purchase process is scheduled or underway. Non-Producing Members shall have all the rights and privileges accorded General Members, except those of appointing representatives to the Board of Directors, voting, holding office or serving on committees unless authorized by the Board. A Non-Producing General Member will automatically become a General Member once it is confirmed that production and shipments have commenced. Dues responsibilities will change concurrently with becoming a General Member.

All applicants must be approved by the CPA Board of Directors. Applicant further agrees to pay all CPA dues and assessments when invoiced. The dues structure for both general member categories includes the annual base dues plus monthly shipments-based dues for each mill's reported monthly shipments. The company's cumulative year-to-date shipments then determine the dues rate based on the following tiers:

Annual Base Dues		$6,000
Monthly Shipments Based Dues	**Cumulative Company Shipments**	
Tier 1	First 50 MMSF	$0.24/MSF
Tier 2	Next 200 MMSF	$0.23/MSF
Tier 3	Next 250 MMSF	$0.22/MSF
Tier 4	Over 500 MMSF	$0.21/MSF
